

# FIX-MAG-01

## Heavy-Duty Magnetic Fixing Kit for Securing 3<sup>rd</sup> Party Controllers to Steel Housings or Enclosures

The Dycon MAG-FIX-01 kit does away with the need to drill and tap holes to secure any PCB to a metal housing. Each kit comprises of 4 complete units, these have a heavy-duty powerful magnet, designed to clamp firmly onto the base of and steel housing, and an 8mm stand-off with a PCB M3x6 Pozi PCB fixing screw. The Dycon MAG-FIX-01 is especially useful for situations where a power supply, an access system controller or another peripheral device needs to be installed as a retrofit. Normally, the housing would need to be drilled and tapped to accommodate it, a difficult task if the housing is already screwed to the wall and wired in. Simply screw the new PCB to the 4 stand-offs, then offer it to the required position in the housing, the powerful magnets do the rest! The Dycon MAG-FIX-01 does no interfere with anything fitted on a PCB and provides reliable, quick solution to system expansion.

Part Number	MAG-FIX-01
Description	4 x heavy-duty magnetic fixings for securing PCB's / 3 <sup>rd</sup> party controllers to metal housings
Alternative Dycon Fixing options available. For options D and E, please contact us for more details	<ul style="list-style-type: none"><li>A. 8mm stand-off hex M3 screw male/female with M3x6 Pozi screw for PCB fixing</li><li>B. 8mm stand-off hex M3 screw female/female with M3x6 Pozi screws for PCB and housing base fixing</li><li>C. PCB stand-off sticky feet for 3.5mm PCB hole</li><li>D. Set of 4 custom holes (Minimum Order Quantity applies)</li><li>E. Custom M3 tapped holes in base of any housing (Minimum Order Quantity applies)</li></ul>
