

FIX-MAG-01

Heavy-Duty Magnetic and other Fixing Kits for Securing 3rd Party Controllers/PCB's to Steel Housings or Enclosures

The Dycon FIX-MAG-01 kit does away with the need to drill and tap holes to secure any PCB to a metal housing. Each kit comprises of 4 complete units, these have a heavy-duty, powerful magnet, designed to clamp firmly onto the base of and steel housing, and a 10mm stand-off with a PCB M3x6 Pozi PCB fixing screw. The Dycon FIX-MAG-01 is especially useful for situations where a power supply, an access system controller or another peripheral device needs to be installed as a retrofit. Normally, the housing would need to be drilled and tapped to accommodate it, a difficult task if the housing is already screwed to the wall and wired in. Simply screw the new PCB to the 4 stand-offs, then offer it to the required position in the housing, the powerful magnets do the rest! A FIX-MAG-01 does not interfere with anything fitted on a PCB and provides reliable, quick solution to system expansion.

Two types of conventional 10mm stand-offs are also available. We can supply housings with custom drilled and tapped holes, please contact Dycon Sales for further details and costs.

Part Number	Description
FIX-MAG-01	Set of 4 x heavy-duty magnetic fixings for securing PCB's / 3 rd party controllers to metal housings
	Other Dycon fixing options for PCB's / 3rd Party modules / housings
DY-FIX001	Set of 4 x 10mm stand-off, hex M3 screw M/F with M3x6 Pozi screw for PCB fixing
DY-FIX002	Set of 4 x 10mm stand-off, hex M3 screw F/F with M3x6 Pozi screws for PCB & housing base fixing
Contact Dycon Sales	Set of 4 x custom size & position holes (Minimum Order Quantity applies)
Contact Dycon Sales	Custom M3 drilled & tapped holes in base of any housing (Minimum Order Quantity applies)
