

Bringing it Home Mk. 2

At Dycon Power Solutions Ltd, we have always been proud that the vast majority of our PCB's are UK-produced at factories in Wales. We have now taken our 'build-it-in-Britain' campaign to another level by announcing that, from 1st January 2021, all of our mild-steel housings and racks are now also made here!

Our supplier is another West Country manufacturer, so we are removing the need to truck in housings across Europe or shipping them 11,000 nautical miles from the Far East

This will have a dramatic impact on Dycon's already strong 'Carbon Footprint' and, in turn, can help our customers reduce theirs.

Check out the extensive range of steel housings at www.dyconpower.com or download then housings datasheet at <http://www.dyconpower.com/images/uploaded/download-files/data-sheet-for-dfxs4-0p-d15x8-d15x4-bnc-output-splitters-main-original.pdf?v=0.28618900%201611248573>
